

Enhance Your Skills in Stroke Care! Join Our 7-Week Course + Hands-On Lab

Introducing Algonquin College's New Stroke Care Course

Developed in partnership with the Champlain Regional Stroke Network (CRSN), this specialized training equips Personal Support Workers with practical, evidence-based skills to confidently care for stroke survivors.

Course Highlights:

- 7 weeks synchronous online learning (Tuesday Evenings 6:30-8:30pm, May 12-June 23)
- Interactive case scenarios & presentations
- Six-hour in-person lab at Woodroffe Campus (Saturday, June 27 9:00am-3:00pm)
- Access to resources: Smart Tips for Stroke Care, Stroke Skills Toolkit, and more

Topics Covered:

- Cognitive & behavioral changes post-stroke
- Communication after stroke (including aphasia)
- Vision and perceptual changes post stroke
- Swallowing management
- Movement, bed positioning, transfers & ambulation

Why Take This Course?

- Learn from experts in collaboration with CRSN
- Enhance your professional skills and patient outcomes
